## 1. Introduction

Online shopping is like a glass case, you can see through it and find everything you need, online shopping is being popular among all age groups. There is exponential growth in this kind of market. More online stores are opening, and competition is also becoming higher to sell products. But online marketplaces are building trust and giving convenient opportunities to their buyers and also a great opportunities for the vendors to show their products. Shopaholics are smarter, they search and compare products before making the final payment. Some people still have fear and don't like to buy products online, but others are frequent buyers. Over many disadvantages, people are becoming aware of the importance of online shopping, primarily due to the Covid-19 emergency we are facing.

## 2. Importance

There are so numerous reasons why online shopping is so important.

### 2.1 Product selection and variety of products

Consumers find a product of interest by visiting the website of the retailer directly or by searching among alternative vendors using a shopping\_search\_engine, also physical stores have limited stock. They only keep those things which are common and most selling. There are many different reasons which affect the availability of other products. The local retailer also tries to sell their limited stock. While online shopping showcase variety from their stock and various stores. 63% of shoppers shop online because you can browse and select products as per your choice and latest trend. You can even buy used products online. Another reason why online shopping is trending is that you will easily find various products on a single platform.

### 2.2 Convenience of Not Going to Stores

Online shopping is easy and simple, you don't have to get ready and go to the store or even to worry about how you would go to the store or if the road is crowded. You don't need to worry about your working hours. Today online shopping is possible on your mobile phone, just install the app and buy anything you need for you and your loved people.

### 2.3 Better prices

The purpose of online shopping is not only the availability of a wide range of different products. But they offer a lower price as well. That's the one reason why do people shop online. There are several options available to compare prices from different stores. Believe nothing problematic at lower prices. E-Retailers only reduce their profit margin to attract

customers. They understand the weakness of buyers. Occasionally e-retailers offer discounts on different products and best deals to increase their sale among competitors. Also you can use coupon codes and deals available on coupon sites.

#### 2.4 No Sales Pressure

When you visit physical stores, the floor assistants try to lure you into buying more items. Sometimes we go inside the store to buy one thing but return home with additional three or four items, which we later realize are of no use or even you get stressed because of them.

#### 2.5 No crowd

Most of us hate the crowd and point\_of\_sale queues. It is common during festivals and special occasions. In a crowded area, shopping becomes a challenging task. In this situation in a local market, you won't be able to stand in your favorite store due to limited space and less attention towards you. Parking of vehicles may become another issue during peak hours. After looking at the present scenario, it is best to avoid the crowd and shop online than to go to stores amid Covid infection.

#### 2.6 Easy checkout and delivery

Online shopping makes checkout procedure easy and also saves us from the hassle of carrying bags around.

#### 2.7 Clear information about products

When a customer visits an online shopping platform, he gets clear information about the product he wants to purchase. The user will also know whether the product is environment-friendly or not, also the customer can find reviews about the product.

#### 2.8 Vendors

Online marketplace for the vendors is very important as they can save the rent of the store, and they can expand easily.

### 3. Disadvantages

Given the lack of ability to inspect merchandise before purchase, consumers are at higher risk of fraud than face-to-face transactions. When ordering merchandise online, the item may not work properly, it may have defects, or it might not be the same item pictured in the online photo. Merchants also risk fraudulent purchases if customers are using stolen credit cards or fraudulent repudiation of the online purchase.
